The invention that is claimed is:

1. A method for pricing and selling Family Protector Insurance comprising:

   receiving information relative to the proposed purchase of Family Protector Insurance;

   determining the price of the Family Protector Insurance;

   conveying the price and policy terms to the party interested in purchasing Family Protector Insurance.

2. The method of claim 1, wherein the step of receiving information includes receiving name and social security number.

3. The method of claim 1, wherein the step of receiving information includes receiving a copy of the court ordered divorce decree.

4. The method of claim 1, wherein the step of receiving information includes receiving a copy of the court order containing the child support award.

5. The method of claim 1, wherein the step of receiving information includes receiving a copy of the court ordered alimony award.

6. The method of claim 1, further comprising the step of inputting the information into a computer or agent terminal.

7. The method of claim 1, further comprising the step of inputting the information into a computer or agent terminal and of conveying the information to the insurer via computer network.

8. The method of claim 1, wherein the step of receiving information relative to the proposed purchase of Family Protector Insurance is accomplished by receiving the information via a computer network.

9. The method of claim 1, further comprising the steps of conveying information to the insured.

10. The method of claim 1, further comprising the steps of conveying information to the insured wherein the step of conveying the information to the insurer includes conveying the information via computer network.

11. The method of claim 1, wherein the step of receiving information relative to the proposed purchase of Family Protector Insurance is accomplished by an insurance agent obtaining the information from the party interested in purchasing the Family Protector Insurance.

12. The method of claim 1, wherein the step of determining is accomplished by a computer program calculating the price based upon the information received.

13. The method of claim 1, wherein the step of conveying the purchase price is accomplished by conveying the purchase price to the party interested in purchasing Family Protector Insurance through a computer network.

14. The methods of claims 1, further comprising the step of receiving a request to purchase Family protector Insurance.

15. A data processing apparatus for determining a price for Family Protector Insurance comprising:

a central controller having a CPU and a memory operatively connected to the CPU;

at least one terminal connected to the central controller that is adapted for communicating with the central controller;

the memory in the central controller containing a program, adapted to be executed by the CPU, for determining a price for Family Protector Insurance based upon information received by the central controller.

16. The apparatus of claim 15, wherein the program in the memory is adapted to receive a request to purchase Family Protector Insurance.

17. The apparatus of claim 15, wherein the program in the memory is adapted to receive a request to purchase Family Protector Insurance and where the program is further adapted to perform a credit card transaction to purchase the insurance to the purchasing party.

18. A data processing apparatus for selling Family Protector Insurance comprising a terminal adapted to communicate with a central controller that calculates a price of the Family Protector Insurance.

ABSTRACT

This invention relates to a method for pricing and selling Family Protector Insurance comprising receiving information relative to the proposed purchase of Family Protector Insurance; determining the price of the Family Protector Insurance; conveying the price and policy terms to the party interested in purchasing Family Protector Insurance. The invention also relates to an apparatus capable of performing these functions.
